

Rehabilitation and Life Care Planning for Adults and Children, since 1987. Serving Ontario.

NRS and CIM have Joined Forces!

NRS is excited to announce we have acquired *Catastrophic Management (CIM)*, and now provide a full range of Life Care Planning, Case Management and Rehab services across a larger geographical region, including into Northern Ontario and other provinces.

Our Life Care Planning Team has grown!

We are pleased to announce that our LCP team has grown; we are joined by **Jodi Harendorf**, founder and owner of CIM, who comes to us with her 25 years clinical and Life Care Planning experience.

NRS welcomes Dr. Steve Blitzer, Chronic Pain Consultant!

At NRS, our Case Coordinators, Physiotherapists, Rehab Coaches/ Kinesiologists/Personal Trainers, Occupational Therapists, Social Workers and Dieticians work together to help clients return to pre-injury productivity, and prevent further injury or deterioration. We are especially pleased to now offer our clients access to services of our new Pain Management Consultant. **Dr. Steve Blitzer** comes to us with over 20 years' experience providing expert opinion and managing complex pain cases.

NRS offers Driver's Assessment and Training!

NRS was pleased to welcome **Terry Ginsberg**, Occupational Therapist with over 20 years Driver Rehab experience, and her team of specialty instructors, way back in February 2016.

How is our driver program different? It's called team work. Terry and her team works with the client, family and treatment team, from the early stages of pre-driving contemplation through to independence on the road.

Learn about our other Specialty Programs!

You likely know that NRS has been offering a full range of services, in over 10 languages, for adults and children for over 30 years.

But did you know that we also offer:

- **E-Rehab:** Our therapists provide Case Management and other therapy services across Northern Ontario and even into other provinces!
- **Vocational Assessment and Training:** Real life situation assessments provide strong evidence that the client either can or cannot return to work; real life situational vocational rehab helps those who have potential to return to work achieve their goals.
- **Day Programming:** Clients can make the most of their rehab dollars while learning/working towards their goals with other survivors in a real life setting.

Thank you so much for taking the time to learn more about how NRS has grown. We hope this will help you help your clients in our ever changing world of personal injury law.

Experience Matters.
